

# Hussnain Umer

## Software Engineer

To work for a progressive organization availing an opportunity where I can utilize my education and professionalism for a growth-oriented career and to increase performance and growth with honesty. I have completely retrained and am eager to hit the ground running in an established team. I appreciate your consideration.

Laravel Framework

## FINAL YEAR PROJECT

E-Recruitment System (WEB BASED PROJECT)

(05/2024 - present)

- **Supervisor:** Ammara Rasheed
- **Description:** An e-recruitment website can provide a centralized platform for candidates to create their profiles/resumes and search for jobs on the other side for recruiter to post job details. The system should facilitate communication between recruiters and candidates, such as sending automated emails for application confirmation, interview scheduling, and status updates. This simplifies the recruitment process for both candidate and recruiters, saving them time and resources.
- **Tools and Technologies:** HTML, CSS, JavaScript, BOOTSTRAP Frameworks, JQuery, PHP, MySQL.

## PROFICIENCIES

- Test cases based on requirements, technical requirements, and design document
-
